

**Multi-step operation problems**

**Using visuals**

**I do**

**Jason loves tennis. He has 25 cans of tennis balls, and each can has 3 tennis balls in it.**

**Jason plans to play 9 tennis matches this season, and he wants to bring an equal number of balls to each match. How many can he bring?**

**We do**

**The Atlanta Braves stadium can hold 41,119 people. The Atlanta Hawks Arena can hold 21,613 people.**

**There is a stadium in Texas that can hold twice as many people as both of these stadiums combined! How many people can it hold?**

**You do together.**

**Each student in Noah's class uses 6 sheets of paper each day.**

**Students in Renee's class use twice as much paper each day.**

**If each class has 25 students, how many sheets of paper get used each day in Renee's class?**

**You do alone**

**Caitlyn bought three video games and a \$35 raincoat. She spent \$188. What was the price of each video game?**
